

CT Digital Finishing Equipment

A3 Programmable Business Card & Paper Card Cutter DFC-3

Business card cutting has never been easier than with the DFC-3. This unique machine can increase your productivity with cost savings.

It is clearly THE SOLUTION to the finishing of on-demand printed materials.

Short Set-up Time

The cutter is best suited for short-run jobs due to its quick and easy set-up process. Up to 50 jobs can be programmed and stored for immediate retrieval through a user-friendly touch panel with LCD display.

Convenient and Fast

Business cards, postcards, bookmarks, greeting cards, or any other form of multiple-up documents on an A3-size paper or smaller can be cut to its finished stage in one pass. All cards on a standard 21-up business card A3 sheet can be cut in less than 10 seconds.
